Kenwood KA-7100. The development of the DC power amplifier can be counted as one of our most significant engineering successes, because it provides an almost perfect linear frequency response that starts virtually from 0Hz. What this means is that the signal amplified has effectively the same waveform as that at the input terminals.

Kenwood Vintage Integrated Amplifiers. Founded in Japan, Kenwood's parent company began selling electronics in the United States during the 1960s. Throughout the 1970s and 1980s, this company produced integrated amplifiers for use at home. These period stereo amplifiers had great quality and remain highly sought-after, even now.
