A virtual private network (VPN) extends an enclave network such as the Non-Classified IP Router Network (NIPRNET) or BLACK core and its resources contained in the network across public networks like the Internet to a remote site such as the MissionMobility Module Devices.

TACLANE-1G (KG-175G) Encryptor - General Dynamics Mission ...

speed link encryptors such as the KG-189 are deployed on aggregated trunk lines and not at all network sites. This is primarily because, like the older KG-95 link encryptor, one encryptor is required for each path between sites. For example, if site " A " wished to interconnect to two other sites, site " A " would require 2 encryptors ...
