About Laboratory Hematology
Urine analysis is commonly called urinalysis. You provide a urine specimen to your doctor, who in turn sends it to a lab to be analyzed. The most routine type of urinalysis involves a dipstick test in which an indicator stick is dipped into the urine. Multiple tests are performed using a single indicator stick.

Laboratory Urinalysis and Hematology for the Small Animal ...
Blood in the urine, also called hematuria, is not a normal finding, but it is not uncommon. Although blood in the urine can be worrisome for the person who experiences it, it is not necessarily a cause for alarm. Hematuria is a sign, not a disease itself. It is an indicator that prompts a healthcare practitioner to investigate further to try to ...

Urinalysis Automated Analyzers - Cardinal Health
A urinalysis is a group of physical, chemical, and microscopic tests. The tests detect and/or measure several substances in the urine, such as byproducts of normal and abnormal metabolism, cells, cellular fragments, and bacteria. Urine is produced by the kidneys, two fist-sized organs located on either side of the spine at the bottom of the ribcage.
