Lathes - Woodworking Tools - The Home Depot
Because the original design did not include backgear (partly
because of the restraints of space, but mainly because it was
wished to avoid gears affecting the turned finish) a dismantable
8.7-1 gear-reduction drive was arranged that could be bolted in
place behind the headstock as and when required.

Our lathes are either gear driven which are more robust and can be worked until the cows come home. If your work will be done home in the garage and noise is a concern? We also offer belt driven lathes that are so quiet, the better half will not know the machine is running! Since the year 2000, our metal lathe line has grown exponentially.
