PowerPoint Presentation  
The ocean contains very little NaCl. Dissolved minerals from rocks are deposited in the ocean. Density is a comparison between volume and salinity. One atmosphere is equal to 20 pounds per square inch (psi).

Ocean Water Flashcards | Quizlet  
Let's take a journey down through the ocean layers (slides 4-8) 1. The ocean has three primary layers. 2. The layers are the surface layer (sometimes referred to as the mixed layer), the thermocline and the deep ocean. 3. The surface layer is the top layer of the water. This layer is also known as the mixed layer and is well stirred from the wind and other forces. This top ocean layer tends to
