should be able to: 1. Describe the three layers of an insect's integument. 2. Describe the advantages and disadvantages of an exoskeleton. 3. Discuss the life histories and growth phases of insects. Endocuticle 4.

Introduction to Entomology part - 1 (Hindi/English)  
Agricultural Field Officer IBPS

Insect morphology is the study and description of the physical form of insects. The terminology used to describe insects is similar to that used for other arthropods due to their shared evolutionary history. Three physical features separate insects from other arthropods: they have a body divided into three regions (head, thorax, and abdomen), have three pairs of legs,
