SAP PM: Maintenance Planning | How-To Guide - by SAP PRESS

Maintenance planning and scheduling, arguably the most neglected functions of modern asset management, are at the heart of an effective maintenance management system. Through the use of work orders and a CMMS, maintenance planning covers the daily or weekly planning, scheduling and control activities to ensure that scheduled work is undertaken, and that available resources are being used optimally.

SAP Help Portal

Maintenance planner supports planning of new installations on a chosen stack level. Maintenance Planner significantly simplifies the installation process by eliminating the steps of system registration and a separate system update planning during installation.
