Maps of the Mind: Charts and Concepts of the Mind and its ...
What is a Mind Map? A mind map is a diagram that is ideal for brainstorming, planning, information gathering, data presentation, and many other uses. What makes a mind map so effective is that it allows us to use both sides of our brains at once. The left side of the brain controls logic, analytics, and details. It is very structured and organized.

Common Types of Mind Maps and How to Use Them
The Google Map Chart displays a map using the Google Maps API. Data values are displayed as markers on the map. Data values can be coordinates (lat-long pairs) or addresses. The map will be scaled so that it includes all the identified points. If you want your maps to be line drawings rather than satellite imagery, use a geochart instead.
