TFA are present in foods containing traditional stick margarine, bakery and frying fats, vegetable shortenings, and vanaspati. They are widely distributed in the foods we consume. Estimates of trans consumption are very varied and this has been hampered by a lack of an accurate database to reflect their contents in common foods [1].

Vanaspati - Purti

The word "shortening" actually refers to all fat and oils, but is most commonly associated with Crisco and other vegetable oil products. To make shortening, oils like soybean, cottonseed or palm are hydrogenated (read: a scientist adds the chemical hydrogen) so they stay semisolid at room temperature.
