The big chunks of it will break and float away in the space. In addition to this, if somehow Earth managed to keep itself together still, there will be no water and atmosphere on the surface of the Earth, and thus, no living organism will be able to survive such a harsh environment. [Image will be Uploaded Soon]

Math Doesnt How To Survive

3. Math is learning a way to think. There are many ways to do this. Math is a time-consuming, linear process of learning. You need to learn one thing before you learn another in order to advance. And during that process, you learn new ways to think and see the world. This is true of learning a second language if one is not spoken at home.

\$\begingroup\$ @Jan For the simple straight-type condenser shown in the picture, the indicated water flow direction from bottom to top is correct in order to ensure that the condenser is always completely filled with cooling water - even at low cooling water flow rates. Certainly, however, this condenser type is not ideal for heating under reflux, because of the small heat exchange surface ...
