Bloom's Taxonomy was primarily created for academic education, however it is relevant to all types of learning. Interestingly, at the outset, Bloom believed that education should focus on 'mastery' of subjects and the promotion of higher forms of thinking, rather than a utilitarian approach to simply transferring facts.

Of course this brand new version includes newer drugs. But this version doesn't come close to superseding the old, and superior, editions. It is about 400 pages shorter, about 20%, effectively more than that because of some new chapters that are timely but not really to the point, at least according to my thoughts.

A gear is a rotating circular machine part having cut teeth or, in the case of a cogwheel or gearwheel, inserted teeth (called cogs), which mesh with another toothed part to transmit torque. A gear may also be known informally as a cog. Geared devices can change the speed, torque, and direction of a power source. Gears of different sizes produce a change in torque, creating a mechanical advantage ...
