MIKUNI NEEDLE JETS (Emulsion tubes) ARE IDENTIFIED BY THE THREE DIGIT NUMBER STAMPED ON THEM, THIS IS THE MIKUNI SERIES NUMBER. You may also find that there are other Mikuni needle jets that though having a different series number stamped on them and not listed on this page, are in fact identical in dimensions to another shown here and thus interchangeable, but you must read each products ...

How to remove the jets, emulsion tubes and needle jet ...

The Needle jets are installed in the Carburetor in one of two ways. Both the Mikuni Primary and Bleed type Needle Jets are put in through the throat of the Carburetor and are held in the proper position by a pin and locked in position but the Main Jet and a washer of some kind. The Keihin type Needle Jet is held in by screwing the Needle Jet into the Carburetor.

Mikuni Needle Jet Removal How To

It orientates the needle jet... You can also, on most Mikuni's I've seen, put the main jet back on the needle jet, after removing the 'ring', or washer as I call it, and use the flat face of the main jet pushing surface.

Genuine Mikuni Carburetor Needles - Niche Cycle

JET NEEDLE (off-idle – 1/4 throttle) (see Fig. T2) The straight diameter portion of the jet needle controls the mixture from just above idle to approximately 1/4 throttle. If the mixture is too rich or too lean in this throttle range, the needle will need to be exchanged for one with a larger or smaller diameter. HSR jet needles are available

NEEDLE JET

The Needle Jet and Jet Needle The needle jet and jet needle regulate fuel delivery throughout the mid-range. As mentioned above, the needle jet takes over most of the fuel delivery from pilot circuit as the throttle is opened. Needle jets are available in assortment of sizes for most of the Mikuni round-slide and flat carburetors.

Jetting Mikuni VM + TM Carbs

The jet needle controls the fuel mixture in the mid range throttle position which is approximately 1/4 to 3/4 throttle opening. The taper of the needle determines the amount of fuel. For example thinner the diameter of the needle, the more fuel will be drawn

Mikuni TMR32 Needle jet removal - Testing out the carbs ...

As the needle jet is the only jet in the carburetor subject to wear, it should be at the top of the list for replacement at annual service intervals. A worn needle jet is so common that it led me to coin the phrase "It's the needle jet stoopid." Again a word of caution: There are some ten odd people making aftermarket parts for Amal carburetors.
