Guide to the Six Kingdoms of Life - ThoughtCo

Classification Of Living Things Study The Six Kingdoms. A long time ago, scientists used just two kingdoms for the classification of living things: plants and animals. As our understanding of life has changed over the past few centuries, we have revised the kingdoms to reflect this. Currently, we use a six-kingdom setup. The kingdoms are: Archaeobacteria, Eubacteria, Protista, Fungi,...

Classification Of Living Things Study Guide

Aerobe – needs oxygen, Anaerobe – does not 7. In observing the 6 kingdoms, there are consumers, producers, and decomposers. Give an example of each and explain how they obtain energy Consumers – eat organisms to obtain their energy – bacteria, protists, animals Producers – use the light for photosynthesis to get energy - bacteria, protists, plants Decomposers – use dead and decaying organisms

to obtain energy – Bacteria, protists, fungi.
