This is the question that political philosopher Michael Sandel examines in his book What Money Cannot Buy: The Moral Limits of Markets. Though markets have been in existence for very long, "market triumphalism", where more and more countries embrace the market mechanism, is a post-Cold War phenomenon.

Morals and Markets by Daniel Friedman is a very different book than I expected it to be. I expected morals to be more in the forefront but they were more in the background. Regardless, this book is very well written. The subtitle "An Evolutionary Account of the Modern World" is a much better description of exactly how the book is.
