Bike Size Chart - How to Choose Right Bicycle - 7 Methods!

Mountain bike frame dimensions from XS to XXL differ for every manufacturer. There is no standard that says a 21" frame MUST be a large size. For example, if a manufacturer makes only three sizes (S, M and L) the smallest frame can be designed for 5'6"– 5'10" (which is a medium on this table).

What You Should Know About Mountain Bike Sizing and Fit

Mountain bikes come in standard sizes (S, M, L) that generally correspond to your height. Many bike manufacturers include size charts that list a height range for each bike size. (If you're in-between sizes, it's best to err on the smaller side as more sizing accommodations can be made with a smaller frame than with one that's too large.)
