"The fact is that my forebears—in the direct maternal line—were among the anatomically modern, musical and artistic humans who first colonized Europe." That claim is laden with import. Swedish science journalist and editor Bojs has been following advances in DNA research for years. She writes, has led to interviewing some 70 scientists and visiting 10 countries.

MY EUROPEAN FAMILY by Karin Bojs | Kirkus Reviews

The first Europeans weren't who you might think Genetic tests of ancient settlers' remains show that Europe is a melting pot of bloodlines from Africa, the Middle East, and today's Russia.

My European Family The First

My European Family tells the story of Europe and its people through its genetic legacy, from the first wave of immigration to the present day, weaving in the latest archaeological findings. Karin goes deep in search of her genealogy; by having her DNA sequenced she was able to trace her lineage back through the Viking and Bronze ages to the Neolithic and beyond into prehistory, even back to a time when Neanderthals ran the European show.

My European Family: The First 54,000 Years by Karin Bojs ...

The Aurignacians of Kostenki, for example, who lived 38,000 years ago in what is now Russia, made jewellery from the teeth of Arctic foxes; their counterparts in Swabian Jura made flutes from the bones of vulture's wings — the first evidence of humans making music. My European Family traces the genetic legacy of these early Europeans.
