Kids learn at their own speed, so don't be too concerned if your child doesn't know as many colors as someone else his age. But if you suspect a problem, talk to your child's doctor about whether you should have your child tested for color blindness, which is the inability to distinguish certain colors.

All of the Colors | Coloring for Kids | Learn the Colors ...
18 months is the generally accepted age for teaching colors. Some kids learn their colors sooner and some learn them later. As a general rule of thumb, 18 months - 2 ½ is a great age for specifically teaching colors. You should always be reviewing colors with your child though, all the way up to kindergarten.

Teaching Tolerance provides free resources to educators—teachers, administrators, counselors and other practitioners—who work with children from kindergarten through high school. Educators use our materials to supplement the curriculum, to inform their practices, and to create civil and inclusive school communities where children are respected, valued and welcome participants.

Nearpod: Make every lesson interactive
At that time, color theory was based on RYB primary colors, which defined red, yellow, and blue as the colors capable of mixing all hues. This is the scheme most commonly taught in grade school and is still used in mixing paints.Later scholars would switch to an RGB (red, green, blue) and CMY (cyan, magenta, yellow) models as advances in technology increased the range of synthetic pigments
