How do the layshaft gears transmit the power from input shaft to leadscrew? I have downloaded the gearbox manual, but it does not show the drive path in various gears. It does not quite make sense to me at the moment, but no doubt it does work somehow !! ... Possibly some of the stock Myford gears will fit or adapt. The 18 teeth gears will need ...

Myford Metric Conversion - haythornthwaite.com

The gears in the box should be hardened, only the early ML7 gearboxes had soft gears and in any case it isn't difficult to establish what you will have. The outer gears meshing to the leadscrew are 26 T from the gearbox layshaft and 52 T on the leadscrew to provide the final step-down ratio for the box to deliver what it is built for.
