Most businesses still operate according to a world view that hasn't changed since the start of the Industrial Revolution. Then, natural resources were abundant and labor was the limiting factor of production. But now, there's a surplus of people, while natural capital--natural resources and the ecological systems that provide vital life-support services--is in decline and relatively expensive.

Natural Capitalism by Paul Hawken - Goodreads

Natural Capitalism makes the case that companies can be more successful by protecting and restoring the environment than by exploiting it. The book is densely packed with facts and factoids but still manages to leave the impression that there is much more knowledge to be tapped where this came from.
