Neuroscience and How Students Learn | GSI Teaching ...

The neuroscience of religion, also known as neurotheology and as spiritual neuroscience, attempts to explain religious experience and behaviour in neuroscientific terms. It is the study of correlations between neural phenomena with subjective experiences of spirituality and hypotheses to explain these phenomena. This contrasts with the psychology of religion which studies mental, rather than physical, phenomena. ...

Neuroscience of religion - Wikipedia

Online personalisation. A fascinating study by Neurofocus, a neuromarketing firm, looked into how consumers respond to and engage with different websites. These websites included the social media sites of the company, as well as the company's website. The study found that consumers who visited the social media sites of the company were more likely to visit the company's website and engage with it. This suggests that social media can be a powerful tool for personalisation and engagement.
