Simula was the first object-oriented programming language.

Read PDF Object Oriented Programming And Java

Java, Python, C++, Visual Basic.NET and Ruby are the most popular OOP languages today. The Java programming language is designed especially for use in distributed applications on corporate networks and the Internet. Ruby is used in many Web applications.

Lesson 8: Object-Oriented Programming

Object-oriented programming (OOP) languages are designed to overcome these problems. The basic unit of OOP is a class, which encapsulates both the static properties and dynamic operations within a "box", and specifies the public interface for using these boxes. Since classes are well-encapsulated, it is easier to reuse these classes.
