In One of Us Dreger returns to these issues as they are raised by the existence of the rarer, but more visible and dramatic, case of conjoined twinning—a condition for which surgery became a treatment option at about the same time as it did for intersex cases and where many of the same assumptions are held.

One of Us

Conjoined twins are a rarity and only occur about once in every 200,000 live births. Being birthed alive is even rarer, about 40% of conjoined twins are stillborn, and living longer than 24 hours is almost improbable - about 35 % of conjoined twins die within a day after they're born. This means that the conjoined twins on this list are absolutely extraordinary!
