The iterative and incremental approach used in OOSAD is characterized by: a. performing a comprehensive plan and analysis of the entire system up front and then proceeding to designing and implementing the final solution.

### OOSAD-Chapter Three | Applications Quiz - Quizizz

The NPV is calculated by combining present values (PV) for each year. The PV uses the discount rate in this formula:  $PV_n = Y \cdot (1 / (1 + i)^n)$  where Y is the monetary amount in today's dollars, i is the discount rate, and n is the number of years for realization of the investment or loan. NPV is a sum of all PVs for the duration of the loan ...
