Oracle Database Backup and Recovery Advanced Users Guide

In Oracle Database 11g, RMAN does the smart thing: it bypasses backing up the committed undo data that is not required in recovery. The uncommitted undo data that is important for recovery is backed up as usual. This reduces the size and time of the backup (and the recovery as well).

Dell EMC PowerProtect Oracle RMAN Agent Administration Guide

I am trying to recover a table which got lost because the schema was dropped using cascade option. Before the user got dropped I took full database backup including archives. I tried to restore and recover the users tablespace but still the table was not recovered. Can someone guide me to recover my table? I am using 11gr2 and OLE-5 Thanks
