Studies into the oracle bones showed the way Chinese script developed over time, cast light onto the divinatory practices of the Shang Dynasty, and proved that the Shang did exist, and was not merely a mythical dynasty in China 's long history.

oracle bone script in china chinese edition
From these pictographic origins, the oracle bone scripts evolved into the Chinese characters used today. How about the spoken lingua franca? Chinese is a challenging language for outsiders to master: as opposed to the mere 26 letters in the English alphabet, there are about 50,000 Chinese characters in total, with an educated person knowing about 8,000.

Early Chinese writing on Oracle bones - Chinasage
Oracle Bones (also known as Dragon's Bones) were the shoulder blades of oxen or plastrons of turtles (the flat, underside of the turtle's shell) which were used in the Shang Dynasty of China (c. 1600-1046 BCE) for divination. A fortune-teller would carve (later, paint) symbols on the bones of the ox or the turtle shell, apply a hot poker or fire until the bone or shell cracked, and then ...

China's oracle bone scripts inscribed into world's memory ...
Oracle bones were used to practice a specific form of divination, fortune-telling, known as pyro-osteomancy. Osteomancy is when shamans (religious specialists) divine the future from the pattern of the natural bumps, cracks, and discolorations in animal bone and turtle shell. Osteomancy is known from prehistoric east and northeast Asia and from North American and Eurasian ethnographic reports.

Oracle Bones: Predicting the Future in Shang, China
The oracle bone scripts, originally discovered from relics of the Shang Dynasty (1600 BC – 1046 BC) in Anyang City, Henan Province, is an ancient type of Chinese language used for divination. It was discovered by epigraphy expert Wang Yirong from the Chinese medical materials he bought, since the animal bones and turtle shells were usually used as medicines in China.

Oracle Bone Script In China Chinese Edition
This strongly suggests that the script had been in use for hundreds of years and it had become convenient to simplify the marks and so the oracle bone script was not some simple, primitive language. Writing was also made on strips of silk, bamboo and wood but as these have not survived it is the oracle bones that receive all the acclaim.

Oracle Bone Script In China
Oracle bone script (Chinese: 甲骨文) was the form of Chinese characters used on oracle bones—animal bones or turtle plastrons used in pyromantic divination—in the late 2nd millennium BC, and is the earliest known form of Chinese writing. The vast majority, amounting to over 50,000 inscribed items, were found at the Yinxu site (in Xiaotun, near modern Anyang, Henan Province).
