Preparing for Our Renewable Future. The next few decades will see a profound energy transformation throughout the world. By the end of the century (and perhaps sooner), we will shift from fossil fuel dependence to rely primarily on renewable sources like solar, wind, biomass, and geothermal power.

Our Renewable Future: Laying the Path for One Hundred ...

This is an excerpt from the book "Our Renewable Future: Laying the Path for 100 Percent Clean Energy," published by Island Press. Liquid petroleum is the world's dominant energy source. Oil is energy dense, portable, and easily moved by pipeline and tanker – characteristics that have made it very well suited as a transportation fuel.

Our Renewable Future: Laying the Path for One Hundred ...

Sometimes the energy of fossil fuels is discussed in terms of barrels-of-oil-equivalent (boe). Where renewable energy is used in the form of electricity, we will discuss it in terms of watt-hours and megawatt-hours (MWh). It is also important to understand the distinction between energy and power.

Our Renewable Future: Laying the Path for One Hundred ...

"The future of renewable energy is obscured by ignorance, noise, ideology, and all sorts of misconceptions --from both cornucopians and catastrophists. Our Renewable Future describes the reality: the transition is possible, but it won't be easy."--Ugo Bardi, University of Florence and The Club of Rome
