1. Identity of tank(s) ballasted. 2. Whether cleaned since they last contained oil and, if not, type of oil previously carried. 3. Cleaning process: .1 position of ship and time at the start and completion of cleaning; .2 identify tank(s) in which one or another method has been employed (rinsing through, steaming,

Part 2 Tanker Information Isgintt
If the entire tank atmosphere could be replaced by an equal volume of inert gas, the resulting tank atmosphere would have the same oxygen level as the incoming inert gas. In practice, this is impossible to achieve and a volume of inert gas equal to several tank volumes must be introduced into the tank before the desired result can be achieved.

Truck And Tank Wash - chemexofni.com

An oil tanker, also known as a petroleum tanker, is a ship designed for the bulk transport of oil or its products. There are two basic types of oil tankers: crude tankers and product tankers. Crude tankers move large quantities of unrefined crude oil from its point of extraction to refineries. For example, moving crude oil from oil wells in a producing country to refineries in another country.

The Collision between the Dynafuel and Fernview, November ...

So, the difference between a Part 1 and a Part 2 ball valve – or differences, to be more precise – are pretty straight-forward. They also explain why Part 1 ball valves are poorly suited, and why it is a good idea to replace a Part 1 valve with a Part 2 valve, especially if the opportunity presents itself.

OIL RECORD BOOK INSTRUCTIONS - Home - IRI

The Collision between the Dynafuel and Fernview, November 14 th, 1963 - Part 2. The Sun Oil Co. tanker Dynafuel (L) is shown with bow of Norwegian freighter Fernview in her side after they collided in haze 11/14, just inside the entrance to Buzzards Bay.
