happens to be a reference to an object, then there are probably methods to access the things referred to, and you should probably stick to those methods unless you're in the class package that defines the object's methods.

giving a reference to a function in another module in Perl ...

Tk is a GUI toolkit tied to the Tcl language, and Tkx provides a bridge to Tcl that allows Tk based applications to be written in Perl. The main idea behind Tkx is that it is a very thin wrapper on top of Tcl, i.e. that what you get is exactly the behaviour you read about in the Tcl/Tk documentation with no surprises added by the Perl layer.

5.30.0 Documentation - Perl Language

The Tcl/Tk Reference Guide is a typeset quick reference guide to John Ousterhout's Tcl script language and Tk toolkit. It is made available by Paul Raines via ftp from here. That version is written for Tcl/Tk versions 8.0, but Tcl/Tk has marched on -- the current release is 8.4.3.
