How to Use the Brenizer Method for Incredible Results

Once you switch to this mode, you can simply align the brackets over the moon, push "OK" and the camera will automatically zoom 1000mm (default behavior). If that's not enough, you can change the value from 1000mm to 2000mm, 2400mm or 3000mm through the camera's menu (Menu -> Moon Shot Mode -> Focal length selection).

Photography Beyond Auto: Switch off auto mode and take ...

A newcomer to photography is often daunted by the different exposure modes a camera may offer. In fact, there are only four, real exposure modes and these are often represented by the word PASM. PASM stands for Program, Aperture Priority, Shutter Priority and Manual and can be found (not always in that order) on the exposure mode dial on top of your camera. Today, rather than give you an in ...
