Infrared photography has been used in conservation since the 1930s. In art the most well-known application is being able to see underdrawings of paintings or changes in composition. Picasso's the Blue Room is a famous example of this. It has also been used to enhance legibility of manuscripts and inscriptions, as seen with the Dead Sea

Scrolls and the International Dunhuang Project.

Digital Photography in Archaeology A GuideBasic

When treating archaeological material that requires documentation of context, as well as preservation, the documentation demands equal emphasis and first priority. The interaction between marine archaeology and conservation is a perfect example of the intimate relationship that can exist between archaeology and conservation in general.
