2018 WAEC Physics Practical Questions and Answers.

Observation: The explanation was well attempted but the calculation was poorly rendered by few responding candidates due to poor handling of the exponential figure. Some candidates substituted wrongly. They are supposed to convert the time given from minutes to the S.I unit which is seconds before substituting into the formula.

Physics Questions and Answers | Study.com
Kinematic equations relate the variables of motion to one another. Each equation contains four variables. The variables include acceleration (a), time (t), displacement (d), final velocity (v_f), and initial velocity (v_i). If values of three variables are known, then the others can be calculated using the equations. This page demonstrates the process with 20 sample problems and accompanying ...
