LaunchLAB iLab Station PROJECTILE MOTION What does the path of a projectile, such as a ball that is thrown, look like? 1 Projectile Motion 2 Circular Motion 3 RelativeVlocitei y 150 Chapter 6 • Motion in Two Dimensions

CHAPTER 3 Transparency
In the field of optics, transparency (also called pellucidity or diaphaneity) is the physical property of allowing light to pass through the material without being scattered. On a macroscopic scale (one where the dimensions investigated are much larger than the wavelength of the photons in question), the photons can be said to follow Snell's Law .
