foundation i.e., piled raft foundation, as it has been proved to be cost effective [48] and also in settlement reduction. Many of the foundations performs poor, which may be in the form of excessive settlement, differential settlement on soft soil [12, 41, 57].Despite of poor performance, piled raft foundation proves to be

An approximate analysis procedure for piled raft foundations

The main advantages of piled raft foundation are: 1. Reduction of settlements, differential settlements and tilts. 2. An increase of overall stability of foundation. 3. Reduces number of piles as compared to conventional piled foundation where bearing effect of raft is ignored which result in more number of piles. 4.
