A Few Notes

About Fuel Systems:

--Generators

consume about 7

gph of diesel

fuel for every

100 kW of

output, but the

fuel pumps on

the generators

can flow as much

Get Free Piping Systems Fuel Oil Generator Flexible Piping

as four times
the generator
consumption.

Depending on how
your return
piping is
routed, supply
pumps may need
to keep up with
generator
consumption or
with their pump
rate.
