Piskunov's textbook is the best pedagogical introduction to calculus with applications. Their weakest points are in its chapters related to differential calculus in several variables. Probably the reason for this deficiency is that linear algebra was not an accepted subject in the technical curriculum at the time this book was written.

Differential And Integral Calculus by N. Piskunov

For something a bit different, try the 2-volume Differential and Integral Calculus by the Russian mathematician N.S. Piskunov. In my opinion this is the best of the "modern" (i.e. less than 50 years old) calculus books. He takes a different (and in my view better) approach than the one usually seen in American texts.
