them, b) a description of the economic and institutional setting of smallholder eucalyptus plantation forestry, and c) consideration of the environmental impacts of eucalyptus silviculture as practiced and its role in structuring land-use among plantation owners. This analysis also enables me to test prevailing theory regarding the

Plantation silviculture | SpringerLink

Plantation Silviculture in Europe provides a thorough overview of the central aspects of conventional plantation forestry, covering site preparation, choice of species, establishment and maintenance, nutrition, spacing, thinning and pruning, and protection. In addition, it acknowledges the changing emphasis and increasing diversity of contemporary forestry, and includes chapters on community woodlands, urban forests, plantings for amenity and sport, and energy crops.

Plantation silviculture | K.R. Shepherd | Springer

Industrial plantations are the "arable" crops of forestry; their principal objective is to grow a product, usually wood fiber, efficiently. The main purposes include fuel production—firewood and charcoal, pulpwood for paper and cardboard, panel products, sawn timber (lumber or sawnwood), and sometimes veneers.

CHAPTER 22 ARTIFICIAL REGENERATION Statement of Purpose

The plantation was destroyed by French invaders in 1696. Other fishing plantations: Bristol's Hope Plantation, a 17th-century fishing plantation established at Harbour Grace, created by the Bristol Society of Merchant-Adventurers. Benger Plantation, an 18th-century fishing plantation maintained by James Benger and his heirs at Ferryland.

Plantation - Wikipedia

Silviculture is the practice of controlling the growth, composition, health, and quality of forests to meet diverse needs and values. The name comes from the Latin silvi- + culture. The study of forests and woods is termed silvology. Silviculture also focuses on making sure that the treatment of forest stands are used to preserve and to better their productivity. Generally, silviculture is the science and art of growing and tending forest crops, based on a knowledge of silvics, i.e., the study o
