Q: Is pneumonia in HIV disease patients always considered an HIV-related condition? **A:** There are Official Guidelines for Coding and Reporting that must be adhered to when coding and reporting of HIV disease. If the documentation is not clear about the reason for the admission or whether the condition is related to the HIV disease, a query may ...

Clinical and Coding Conundrums - ACDIS

QUESTION: A patient is admitted with pneumonia and atrial fibrillation and both are present on admission. The patient receives antibiotics for the pneumonia and a pacemaker during the stay, but undergoes no other procedures. Does the procedure automatically make ICD-9-CM code 427.31 for the atrial fibrillation the principal diagnosis?

Q&A: Assigning a principal diagnosis for a ... - hcpro.com

If a provider maintains that a patient has pneumonia, especially when it is documented with uncertainty at the time of an inpatient discharge or in response to a clinical validation query, then we are on solid ground to code the condition. Coding Clinic, Fourth Quarter, 2016, page 149, is a valid defense of this principle.

Q&A: Coding 'aspiration without pneumonia' - www.hcpro.com

When a patient has both influenza and pneumonia due to the influenza, per coding conventions, the influenza will be sequenced first, under code J14 Pneumonia due to H Flu. There is a "code first" note for associated influenza, if applicable.

Q&A: Coding guidelines for COPD and pneumonia | ACDIS

Coding Clinic states that coders should report postobstructive pneumonia with code 486 (pneumonia, organism unspecified) when the physician doesn't document the cause. If the physician identifies the causative organism of the pneumonia, then coders should use the more specific pneumonia code.

JustCoding's Inpatient Documentation Pocket Cards

Sarah Nehring, CCS, CCDS, writes that CDI and coding professionals must understand the guidelines for coding myocardial infarctions (MI) as well as the clinical difference between type 1 MIs and type 2 MIs so they can be clinically validated, queried, and reported effectively to avoid negative reimbursement ramifications.
