Treatise on Invertebrate Paleontology

A web portal is a specially designed website that brings information from diverse sources, like emails, online forums and search engines, together in a uniform way. Usually, each information source gets its dedicated area on the page for displaying information (a portlet); often, the user can configure which ones to display.

Portals A Treatise On Internet

The portals dominating internet-distributed television in the United States in 2017 do not conform to the logics of either the publishing or flow models of media production. Portals are not effectively conceptualized according to the flow model because most operate without a linear schedule.
