Past research shows that repetition results in increased learning. However, it is not clear whether repetition adds more information to memory (quantitative hypothesis), or allows the learner to use a more sophisticated method of encoding (qualitative hypothesis). This study investigates the process and effectiveness of repetition as a study technique.

Does practice really make perfect? -- ScienceDaily

Practice makes perfect and if you practice battling and competing and working hard, then that will transfer over in a game. If you practice just kind of floating around out there in practice, you know that's going to transfer over, too. So I think the harder you work and the more you compete, then that's how you're going to play in a game.
