Inhibitors classifications. The corrosion inhibitors can be chemicals either synthetic or natural and could be classified by: •the chemical nature as organic or inorganic; •the mechanism of action as anodic, cathodic or a anodic-cathodic mix and by adsorption action, or; •as oxidants or not oxidants.

Principles and Prevention of Corrosion (2nd Edition ...

The mechanism of crevice corrosion. The release of metal ions (M +) at the anode is balanced by a reaction at a nearby cathodic site, which involves using up oxygen from the surroundings. In a crevice oxygen can soon be used up and if the conditions are stagnant enough, replenishment of the oxygen to the crevice from the bulk solution is stifled.
