You can search and download free books in categories like scientific, engineering, programming, fiction and many other books. No registration is required to download free e-books.

### Ratio and Proportion - Aptitude Questions and Answers

Using Proportions to Solve Percents. A percent is actually a ratio! Saying "25%" is actually saying "25 per 100":  $25\% = \frac{25}{100}$ . We can use proportions to solve questions involving percents. This is to put what we know into this form:  $\frac{\text{Part}}{\text{Whole}} = \frac{\text{Percent}}{100}$

Find Ratios in Maths - Grade 7 Maths Questions With ...

On top of all this, you should be able to recognise graphs that represent direct proportionality. An equation  $y = 3x$  for example, is a straight-line graph with gradient 3 and y-intercept 0. This is true of all direct proportion graphs: they all pass through the origin (the point (0,0)). If you have a graph that doesn't, then the two quantities on the axes must not be directly ...
