the tree represent a stage at which languages split from each other, forming new sub-families.

Proto Indo European Trees The

Proto-Indo-European (PIE) is the linguistic reconstruction of the ancient common ancestor of the Indo-European languages, the most widely spoken language family in the world. Far more work has gone into reconstructing PIE than any other proto-language, and it is by far the best understood of all proto-languages of its age.

The Proto-Indo-European homeland was the prehistoric urheimat of the Indo-European languages – the region where their reconstructed common ancestor, the Proto-Indo-European language, was originally spoken. From this region, its speakers migrated east and west, and went on to form the proto-communities of the different branches of the language family. The most widely accepted proposal about the location of the Proto-Indo-European homeland is the steppe hypothesis, which puts the PIE ...
