Quality control of preserved fruits is very important for ...

The attainment of high-quality palm products at minimum cost demands that more emphasis be placed on the production side, i.e., the effort must be concentrated at the field and mill level. All field and mill personnel must be involved in quality control and must be responsible for the quality requirements. A long-range effort at developing employee responsibility and job enlargement is required.

Quality control in fruit and vegetable processing ...

In fruits and vegetables, taste is usually expressed in terms of the combination of sweet and sour principles that are an indication of ripeness and eating quality. The content of soluble solids is a good estimate of total sugar content, and many fruits should have a minimum content of solids to be harvested (Table 14).
