This loosens the soil and makes it more prone to erosion. Logging and Mining. A large number of trees are cut down to carry out the logging process. Trees hold the soil firmly. The canopy of the trees protects the soil from heavy rainfall. The leaf litter that protects the soil from erosion, is also lost during logging.

What Is Soil Erosion? - Definition, Causes, Effects, Prevention - BYJUS

Soil also contains ores from which we can extract metals such as iron, copper, gold, and aluminium. Modern farming techniques using fertilizers and pesticides are degrading the quality of soil suitable for growing crops in the long run. Mining and deforestation are resulting in the loss of fertile soil. Thus, it is essential that we protect it.

Air, Water & Soil- Important Natural Resources Essential For Life - BYJUS

A soil sample taken from a field is placed in the aluminium box, weighed, dried in an oven at 105°C (221°F) and reweighed. The measurements are as follows: Weight of moist soil plus aluminium box = 159 g . Weight of oven dried soil plus aluminium box = 134 g . Weight of empty aluminium box = 41 g . Calculate the moisture content of the soil.
