To Read - Reading List - Apps on Google Play

Creating a list using lapply() You don't need to have a list already created to use lapply() - in fact, lapply() can be used to make a list. This is because the key about lapply() is that it returns a list of the same length as whatever you input.. For example, let's initialize a list to have 2 empty matrices that are size 2x3.
