Blueprint reading therefore refers to the process of interpreting a drawing. An accurate mental picture of the object upon completion can be formulated from the information provided. While originally blueprints did have a blue background with white lines (as a result of the process used to produce them), subsequent improvements to the copying process involved ammonia and coated papers that ...

players can play. It is a system of 2 man Read and Reactions, that can be drilled to the point of habit. These 2 man habits are not just a random collection of good 2 man games. The Read and React system ties these 2 man reads into a seamless 5 man offense that can be adjusted to any set, formation, type of player, or style of play.

Layer 4 in the Read & React is about how the offense continues if Dribble Penetration fails or Penetrate, Draw the Defense, and Pass does not produce a shot. I don't think most understand WHY we Circle Move on Dribble Penetration in the Read & React. Here's why: Elementary Reason: Receivers moving vs standing are harder to guard.

Iowa University Game Clips - Mix of Read & React Layers

See Rick Torbett's Betterbasketball Read and React Zone Offense. We modify the man-to-man Read and React offense for attacking zones. All the basic Read and React rules apply, with the following modifications: Pass and Cut - becomes "hook and look (and hold)". Our perimeter passer cuts, but instead of a basket cut, makes a button-hook cut into a seam or gap in the zone.
