An oral history occurs when an individual plans and records the spoken recollections of another individual. By recording an interview with that individual, you create a new historical record which can supplement existing records, such as official documents, written diaries, photographs, and the oral histories of other veterans.

Which voice recorder will best capture my parents' oral ...

Oral history is the collection and study of historical information about individuals, families, important events, or everyday life using audiotapes, videotapes, or transcriptions of planned interviews. These interviews are conducted with people who participated in or observed past events and whose memories and perceptions of these are to be preserved as an aural record for future generations. Oral history strives to obtain information from different perspectives and most of these cannot be found

Recording Oral History: A Guide for the Humanities and ...

Recorded history or written history is a historical narrative based on a written record or other documented communication. It contrasts with other narratives of the past, such as mythological, oral or archeological traditions. For broader world history, recorded history begins with the accounts of the ancient world around the 4th millennium BC, and coincides with the invention of writing. For some geographic regions or cultures, written history is limited to a relatively recent period in human h
