Adaptive Components - Pattern Based
Adaptive Placement Points. Adaptive points are modified reference points that are used when designing an adaptive pattern component. Adaptive points can be used for component placement (Placement Point) or as shape handles (Shape Handle Point). If the adaptive points are used for placement, they will be numbered in the order in which they will ...

REVIT PATTERN AND ADAPTIVE 009
Adaptive points are modified reference points that are used when designing an adaptive pattern component. Adaptive points can be used for component placement (Placement Point) or as shape handles (Shape Handle Point). If the adaptive points are used for placement, they will be numbered in the order in which they will be placed when the component is loaded.
