Supplemental Restraint System (SRS)Air Bag System SRS air bag systems aim to improve safety by working in conjunction with a seatbelt to minimize impact to occupants in a collision. The front air bags for the driver's seat and passenger's seat deploy when a moderate or severe frontal impact is detected, mitigate impact to the head and chest.

[How Does Your Car's Airbag System Work - CarsDirect](#)

While the air bags in your car are designed to enhance safety during accidents, you do need to take a few precautions to ensure that you don't damage the system, or increase your risk of injury. Here's what you should know: Never ever place sharp items on the seat or near an air bag.

[Air Bag Safety | OSHA Safety Manuals](#)

The airbag system is one of the most important parts of your vehicle's safety components. Proper airbag deployment can ensure that you and your passengers survive a crash that you may have otherwise experienced serious injury or death as a result of. Airbag deployment has saved thousands of lives through the years.

[Airbag - Wikipedia](#)

Air bag benefits are proven, but most of us have seen the safety warnings posted in vehicles and heard the news that they can kill. To date, air bag deployment has killed 147 people due to the force of the airbag itself, not wearing a seatbelt, and sitting too close to the airbag. Air bags are not soft pillows: they are balloons of air that inflate with a blast of energy. Workers that drive on the job should be aware of the ways to increase air bag effectiveness for themselves and their ...
