Ohloff, Wilhelm Pickenhagen and Philip Kraft's Scent and Chemistry : The Molecular World of Odors was an especially eagerly awaited publication Bois de Jasmin A Primer on Sensory Pursuits

scent and chemistry book - Basenotes.net

Chemistry's Role A smell is a molecule that is light enough to float in the air. Fragrance materials are generally semi-volatile organic compounds and their molecular weight rarely exceeds 260 AMU. However, not every molecule that floats in the air has a smell or has enough of a smell to be recognized by the human nose.
